REMAINING WARRANTY:

Any part, component, or product that is replaced under the terms of the Limited Warranty, will be covered under the same warranty for the duration in which the original warranty for the product is applicable.

WARRANTY PROCEDURE:

1. **Part Replacement:**
Daizuki will provide a new or refurbished part at no charge for the part itself if it has been determined to have failed due to defects in materials or workmanship under standard use and proper maintenance, at the discretion of Daizuki.
2. **Shipping Costs:**
The owner of the product is responsible for the payment of shipping costs for the replacement part. Daizuki does not cover the shipping expenses.
3. **Return of Failed Part:**
Daizuki reserves the right to request that the owner of the product returns the failed part before or after a replacement part is sent out. This is likely for quality control or warranty verification purposes.
4. **On-Site Troubleshooting with a Licensed HVAC Technician:**
Daizuki recommends having a licensed HVAC technician on-site while troubleshooting with their Technical Support department. This allows for addressing observed symptoms, specific electrical and mechanical measurements, and any other detailed information that may be necessary for a proper diagnosis.

Having a licensed technician present can help ensure that the troubleshooting process is accurate and effective. These policies are in place to ensure that warranty claims are handled efficiently and that the products are properly maintained and serviced by qualified professionals. Customers should be aware of their responsibilities regarding shipping costs and the involvement of licensed technicians in the troubleshooting process.
